Department of Nursing,
NYU Langone Medical Center &
Dalla Lana School of Public Health,
University of Toronto (U of T)

Accredited through the Office
of Continuing Education and
Professional Development, Faculty of
Medicine, University of Toronto

IIWCC Overview

The International Interprofessional Wound Care Course (IIWCC) is designed for wound care specialists with prior education and experience: physicians, nurses, and allied health professionals in the wound care field related industry.

The IIWCC is a 12-month course, offered in partnership with the University of Toronto. The objective is to provide a comprehensive educational experience for wound care specialists and to translate new knowledge into practice.

- Two core (mandatory) residential weekends (4 days each)
- Fourteen self-study modules (*see modules list*)—nine required to complete: 5 Faculty Chosen (F), 4 Student Chosen (S)
- A selective is written and presented to class members. The selective is related to course content translated from each students' practice.

Participant Objectives

- Assess and critically review wound care literature in key subject areas (residential weekends, modules)
- Integrate wound care principles by a self-directed learning program formulated with a learning contract
- Demonstrate the application of best practices by developing a selective related to the learner's everyday activities

Qualifications

This is not a basic course; therefore, participants must have a health professional degree or provide proof of relevant skin and wound care experience.

Why Attend the IIWCC

- Certificate of completion from University of Toronto / NYU Langone Medical Center
- Connect with international key opinion leaders
- Readings pre-selected by faculty
- Small group interprofessional collaboration
- Hands-on patient care demonstrations
- Comprehensive therapeutic strategies
- Networking with colleagues old and new
- Information on new products and services
- Training to be an educator (key opinion leader)

The course faculty represents the following disciplines:

Physician groups:

- Anesthesia
- Dermatology
- Infectious Disease
- Medicine
- Podiatry
- Surgery (General, Trauma, Plastic, Vascular, and Hyperbaric)

Nursing:

- Administration
- Education
- Research
- Wound and Ostomy

Rehabilitation:

- Physical and Occupational Therapy

There are over 1000 graduates of the IIWCC. This community and network of wound care specialists have been advancing and changing the practice and patient care outcomes of wound care at the local, national, and global level for almost 20 years.

A complete list of faculty will be announced at a later date.
